

HEVC Single-Tuner Satellite Receiver

EXPERIENCE THE BENEFITS OF HIGH-EFFICIENCY VIDEO CODING (HEVC)

with Wally, DISH's feature-rich satellite receiver that sports a modern look and brand-new user interface. Wally's technology enables users to enjoy a variety of apps and other great features.

Features

- Single-tuner functionality with DISH Pro Plus, DISH Pro, and Legacy LNBs
- DVR capability with external hard drive (EHD)¹
- New user interface with HD graphics, easy content discovery, and more info on programs and movies
- Enhanced viewing experience through triggers, which allow customers to watch free previews, tune to shows they might like, and see informative popups on-screen, and more
- Netflix and other web apps
- Bluetooth® audio support with use of separate Bluetooth Adapter
- Over-the-air (OTA) channel integration via separate OTA adapter

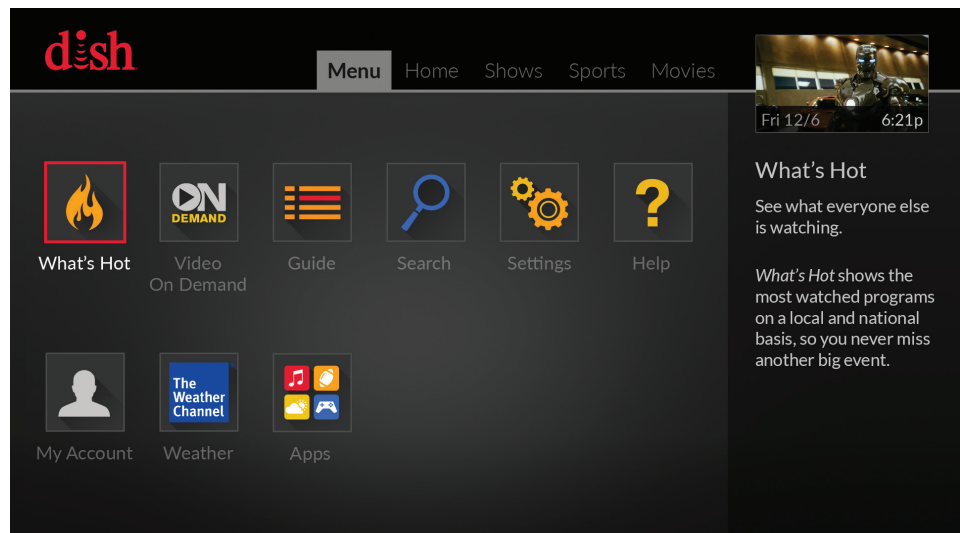

- Wi-Fi connectivity via Wi-Fi adapter
- Up to 2-day Electronic Program Guide (EPG) and optional 9-day EPG with a connected EHD
- Seamless integration of live linear Internet channels in the EPG
- Mobile antenna support for Tailgater® and other mobile antennas

Coming Soon

- Video On Demand
- Watch 1 DVR recording and record up to 3 programs (2 SAT, 1 OTA)²
- Targeted advertising via INVIDI
- Event logos via Internet without need for an EHD

Notes:

1. An EHD that supports USB 2.0 or higher is required.
2. For DISH Pro Plus (DPP) installations only.
